PROFESSIONAL SUMMARY

Flutter Developer specializing in production-grade, full-stack mobile ecosystems - from Clean Architecture (Repository-Service-Provider) through Firestore-optimized backends and RESTful API integration. Built and shipped systems spanning real-time logistics, healthcare booking, and e-commerce, with hands-on ownership of admin dashboards, role-based access control, and third-party API integrations. Currently completing a Bachelor's in Applied Computing while delivering across four Flutter internships.

EXPERIENCE

Flutter Developer Intern | Internship Pakistan (Remote)

Aug 2025 - Oct 2025 (Concurrent)

- Shipped four independent Flutter applications end-to-end including Eventify, a full event-registration system with Firebase Authentication, Hive-based bookmarking, and QR ticket generation covering state management and offline persistence.

Flutter Development Intern | DevelopersHub Corporation (Remote)

Jul 2025 - Sep 2025 (Concurrent)

- Delivered production-ready modules across authentication and API-networking workstreams, including a secure Firebase Auth/Firestore account flow and a real-time task manager with live Firestore-backed UI updates.

Flutter App Development Intern | Softnetix (Remote)

Mar 2024 - Apr 2024 (Concurrent)

- Built a categorized expense-tracking module with real-time input validation and Hive-based offline persistence, plus a companion task-management tool focused on reliable local data handling.

Android App Development Intern | CodSoft (Remote)

Mar 2024 - Apr 2024 (Concurrent)

- Built and shipped two independent Android applications in Flutter - a live weather tracker and a quote-browsing app from API integration through to a polished, minimal UI.

TECHNICAL SKILLS

- Languages & Frameworks:** Dart, Flutter
- State Management:** GetX & Provider
- Backend & Storage:** Firebase (Auth, Firestore), RESTful APIs, Hive, SharedPreferences
- Architecture & UI:** Clean Architecture (Repository-Service-Provider), Responsive UI Design, Dialogflow (Chatbots)

KEY PROJECTS

Drips Water - Water Delivery App

- Architected a full-stack delivery ecosystem end-to-end using strict Clean Architecture for a testable, maintainable codebase.
- Built a real-time admin dashboard tracking live revenue and dispatch fulfillment via Firestore snapshots, backed by a custom delivery scheduler and Firestore-level role-based access control.
- Integrated Dialogflow for automated customer assistance through REST API webhooks.

Doctor Hunt - Doctor Finding App

- Built an end-to-end healthcare platform spanning doctor discovery, appointment booking and pharmacy integration.
- Engineered secure card payment handling and reactive, granular state management across the app using GetX.

Glitz Mart - E-Commerce App

- Built a fully functional online store integrated with RESTful APIs and Firebase, featuring category navigation, personalized greetings, and cart management via GetX.

Eventify - Event Management App

- Built a cross-platform event registration app featuring Firebase Authentication, fast offline-capable Hive local caching, and JSON-based QR code ticket generation and validation.

EDUCATION

Bachelor of Science in Applied Computing | Iqra University

Oct 2024 - Sep 2028 (Expected)

CERTIFICATIONS

Mobile Application Development | Bano Qabil, Karachi

Dec 2023
